

***08.24.2022. Today, the ARL received the results for the rabies tests performed on two felines picked up last Saturday from Leesport Borough.***

***The adult feline tested positive for the virus, while the kitten tested negative.***

***The adult cat attacked a resident and died which prompted the rabies protocol. The victim received medical attention.***

***Our staff is currently working with Leesport Borough and assessing the status of a cat colony in the area to ensure that these cats are healthy and the site is safe for residents and their pets.***
